EDUCATION

Abdul Wali Khan University, Mardan
Bachelor of Science, Computer Science

June 2026

SKILLS

Stack: MERN Stack — MongoDB (Database), Express.js (Backend Framework), React (Frontend Library), Node.js (Backend Runtime)
Programming: C++, HTML5, CSS3, JavaScript
Applications: React Native, Visual Studio
Languages: Urdu, English, Arabic

PROJECTS

EduAI Hub

- Developed a comprehensive AI-driven educational platform with intelligent learning pathways and adaptive content delivery.
- Integrated AI-powered chatbot for real-time student support, Q&A, and personalized study recommendations.
- Implemented predictive analytics dashboard to track student performance, identify at-risk learners, and forecast outcomes.
- Implemented role-based access for students, educators, and administrators.

AI-Driven Healthcare Platform with Intelligent Chatbot and Predictive Analytics — Promixa Life Sciences

- Built an AI-powered healthcare platform for Promixa Life Sciences with intelligent symptom analysis and triage chatbot.
- Developed predictive analytics engine for patient health trend monitoring and early risk detection.
- Ensured HIPAA-aware data handling with clean, accessible functionality for medical staff.
- Integrated real-time data visualization for health metrics, appointments, and diagnostic reporting.

Herbal Store

- Developed a Herbal Store Frontend with category-based browsing, dynamic search, and mobile-first layout.
- Improved customer journey through optimized navigation and streamlined user flows.
- Built scalable, reusable component systems for consistency across the codebase.

University Web Application

- Designed and developed a responsive web app for students and faculty.
- Led full development process from planning through implementation, including prototypes.
- Implemented role-based features: login, course registration, schedules, announcements, dashboards.
- Conducted testing and improved navigation to reduce friction.
- Built reusable components and a mini component library.

Blog Website – AIIFA Blog

- Built a content-focused platform for AI and innovation updates.
- Created a clean, engaging layout for the platform.
- Ensured mobile responsiveness using HTML, CSS, JavaScript, and modern frameworks.

RESEARCH PUBLICATIONS

- PROMIXA STORE: Design and Evaluation of a Production AI-Powered E-Commerce Platform with Retrieval-Augmented Generation, Statistical Forecasting, and Market Basket Analysis

AWARDS & ACHIEVEMENTS

- Certificate of Excellence in Web Development – DigiSkills Pakistan
- Best UI Prototype Design – AIIFA Blog (Internal Recognition)
- Outstanding Freelancer Badge – Fiverr (5-star ratings & successful deliveries)
- Hackathon Participant – UX Design Track (Education access prototype)
